EDUCATION

Michigan State University

Bachelor of Science in Computer Science, GPA: 4.0

East Lansing, MI

Aug. 2022 – May 2026

EXPERIENCE

Software Engineer - Capstone

Jan. 2026 – May 2026

Stripe

Remote

- Translated **sponsor requirements** into **API contracts**, **data models**, and sprint deliverables, enabling a **6-person Agile team** to deliver a production-style **SaaS platform** within **16 weeks**
- Designed a **PostgreSQL** schema for **20+ business entities**, using **foreign keys**, **constraints**, **indexes**, and **migrations** to maintain reliable billing, CRM, alert, and webhook data
- Architected **30 Django REST API endpoints** within a **90-endpoint backend**, unifying merchant workflows across **Stripe**, **HubSpot**, **Slack**, and **Google Sheets**
- Enabled secure **multi-business account management** by integrating **Supabase Auth** and enforcing user and account ownership across connected **Stripe** businesses
- Maintained near-real-time consistency across **Stripe**, **HubSpot**, and **PostgreSQL** by engineering **bidirectional webhooks** with **idempotency**, event tracking, retry handling, and failure logging
- Improved **API responsiveness** and external-service reliability by offloading export and integration workloads to **AWS Lambda** and **Amazon SQS**, with containerized deployment through **Docker** and **ECS/Fargate**

Software Engineering Intern

Jan. 2025 – May 2026

Michigan State University

East Lansing, MI

- Streamlined operational workflows for **1,200+ employees** across **10+ departments** by developing **full-stack applications** using **Java**, **JAX-RS**, **Apache Wicket**, and **JavaScript**
- Supported enterprise systems containing **1M+ records** by modifying **REST APIs** and **Microsoft SQL Server** workflows for **fleet**, **billing**, **assets**, **projects**, and **work orders**
- Improved mileage reliability across **200–300 fleet vehicles** by building **lease-management UI pages**, data-loading APIs, input validation, submission throttling, and validated database writes
- Improved **monthly billing accuracy** by debugging **Planon** mileage calculations and correcting business logic responsible for approximately **15 recurring lease discrepancies per month**
- Reduced **release risk** by testing **15+ workflows** and **5+ APIs**, resolving QA defects, completing **GitLab merge requests**, and promoting artifacts through **development**, **QA/test**, and **production**

PROJECTS

JobLens AI | *React, TypeScript, Generative AI API Integration, Prompt Engineering, Zustand*

- Built an **AI-powered resume analysis platform** using **React**, **TypeScript**, and **Puter.js**, generating job-specific **ATS scores** and structured recommendations across **6 feedback categories**
- Enabled users to securely access and compare previous resume analyses by implementing **serverless authentication**, **cloud file storage**, metadata persistence, and client-side state management with **Zustand**
- Streamlined resume review by developing **drag-and-drop PDF uploads**, document previews, asynchronous AI scoring, and prompt-engineered **JSON outputs** for skills, content, structure, tone, and ATS readiness

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, C/C++, HTML/CSS, R

Frameworks & Libraries: React, Django REST Framework, FastAPI, Flask, JAX-RS, Apache Wicket, Node.js, Tailwind CSS, shadcn/ui, Zustand, JUnit, pandas, NumPy, Matplotlib

Databases & Data: PostgreSQL, Microsoft SQL Server, Supabase, MongoDB, Redis, SQL Queries, Relational Data Modeling, Database Migrations

Cloud & DevOps: AWS Lambda, Amazon SQS, ECS/Fargate, Docker, Docker Compose, GitHub Actions, GitLab CI/CD, Vercel

Tools & Platforms: Git, GitHub, GitLab, Postman, Jira, Stripe CLI, VS Code, IntelliJ, Eclipse, PyCharm

Engineering Skills: REST APIs, Webhooks, OAuth 2.0, Generative AI Integration, Prompt Engineering, Event-Driven Systems, Automated Testing, Agile Development
